PROCEEDINGS OF THE 9TH EUROPEAN NONLINEAR DYNAMICS CONFERENCE

Gábor Stépán
Gábor Csernák
Editors

25–30 June 2017
Budapest, Hungary
Budapest University of Technology and Economics

Sponsored by
EUROMECH

Cosponsored by
IUTAM
European Research Council
Furukawa Electric Group
Knorr-Bremse
Bosch

Published by
Congressline Ltd., Budapest

The European Nonlinear Dynamics Conference (ENOC) is part of the European Conferences series, supervised by EUROMECH.
EUROMECH - European Mechanics Society is an international non-governmental non-profit scientific organization. The objective of the Society is to engage in all activities intended to promote in Europe the development of mechanics as a branch of science and engineering. The society is governed by the Council that has overall responsibility for Euromech Conferences.

Proceedings of the 9th European Nonlinear Dynamics Conference
Edited by Gábor Stépán, Gábor Csernák
ISBN: 978-963-12-9168-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and mini-symposia organizers. Some conference presentations may not be available for publication.
The papers reflect the work and thoughts of the authors and are published herein as submitted.
The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Proceedings of ENOC 2017 are published online at
http://congressline.hu/enoc2017/abstracts.php
Papers are published as they are submitted and meet publication criteria. A unique paper identifier (ID) number is assigned to each article at the time of the first publication. Utilization of IDs allows articles to be fully citable as soon as they are published online.

List of Papers by ID

ID	Paper title
2	Calculus on Smith-Volterra-Cantor sets
3	Periodic orbits of a neuron model with periodic internal decay rate.
4	On some extension of center manifold method
5	Rigidity constraints in Analytical Mechanics.
6	Stochastic Asymptotic-preserving Galerkin methods for multiscale kinetic equations with uncertainties
7	An Asymptotic-Preserving Stochastic Galerkin Method for the Semiconductor Boltzmann Equation with Random Inputs and Diffusive Scalings
9	Contributions of the pool of long-lived chronically infected CD4+ T cells in HIV dynamics: a fractional-order approach
14	Waves in Biomembranes with Amplitude-Dependent Nonlinearities
15	Selected aspects involved in dynamics and optimization of cranes with a pivoting boom
16	Model of Person Balancing on the Seesaw
17	Model Free Control of a 2-Input and 2-Output Helicopter System
18	Irregular dynamics of an elliptic vortex in an oscillatory nonlinear flow
19	On perturbations methods and their applicability in the study of vibrations of axially moving strings and beams
20	Decentralized guaranteed cost control for synchronization in networks of linear singularly perturbed systems
22	Evaluating Nonlinear Responses of Asphalt Concrete Mixtures under Time-Dependent Loading: in view of three representation functions
24	Large time-periodic systems in engineering applications
25	Parametric Amplification of Acoustically-Excited Micromechanical Oscillators Using Fringing Electrostatic Fields
28	Inverse scattering problems for the perturbed biharmonic operator
29	Axial and torsional dynamics of a distributed drill string system
30	Asynchronous modes of vibration in a heavy-chain model with linear and rotational springs
31	Chaotic triangle wave generator implementing Chua circuit towards DC/DC converter control
33	Response Regimes in Equivalent Mechanical Model of Weakly Nonlinear Liquid Sloshing
35	Izhikevich Neural Networking Model
37	A real-time gesture classification using surface EMG to control a robotics hand
38	Control of a vertical mode of a cable by a nonsmooth oscillator
39	Energy exhanges in a system of a forced linear structure coupled to a chain of nonlinear oscillators
40	Numerical Study on the Waveform Evolution in Metal Material
42	Analysis of Pivoting Algorithms for LCPs in Redundant Contact Dynamics
44	A Generalised Nonlinear Isolator-Elastic Beam Interaction Analysis for Extremely Low or High Supporting Frequency
45	Torsional vibration damper design using Augmented Lagrangian Particle Swarm Optimization
46	Vibration localization and snaking bifurcations in a purely mechanical system
48	Data preparation for execution of experiments on rigid body motion in a resisting medium

49 An anisometric dynamical integrity measure and its seamless variation with respect to other measures
50 An Online Control Strategy for Time Delayed Vibration Absorber
51 Optimization Criterions of a Multi-Time-Delay Controlled Isolation System with Asymmetrical Nonlinearity
52 An Influence of Nonlinearity and Discontinuity on Sound Transfer in Reconstructed Middle Ear
53 Solitary Waves in Dimer Binary Collision Model: A Comparative Study with Granular Dimers
54 Wave Propagation in Granular Dimers Mounted on Linear Elastic Foundation
56 Analytical Solution for Energy Harvesting from Nonlinear Transverse Vibration of an Asymmetric Bimorph Piezoelectric Plate
57 Influence of Metal Internal Defect on the Propagation of Shock Wave
58 Investigation of the dynamics of the wiper blade around the reversal
59 Fractional-Order Controller Design Based on the Nyquist Diagram for the Vibration Control of a Flexible Beam
60 Two-dimensional motion of a body carrying movable internal masses
61 Fractional order convergence of time-discretizations for semilinear PDEs
62 Delay-Differential Equations Applied to Queueing Theory
63 Topological changes in slow-fast systems: chaotic neuron models
64 Devil's Staircase in an Optomechanical Cavity
65 Reduced-order Modeling of Strongly Nonlinear Systems Using Measured Time Series
66 Evolutionary Dynamics of Membership Distribution Functions of a Forced Triple Well Potential System with Fuzzy Uncertainty
68 Numerical Investigation of pad or air gap between the high explosive and flyer in impelling
69 Capturing similarity solutions in multidimensional Burgers' equation
70 Nonlinear Vibrations Of Functionally Graded Shallow Shells Of A Complex Planform In Thermal Environments
72 A Degenerate Mode Magnetic Acoustic Resonator
73 Anisotropic dry friction with non-convex force reservoirs: modeling and experiments
74 Energy exchange and localization in essentially nonlinear oscillatory systems: canonical formalism.
75 Reference spreading trajectory tracking control: experimental analysis on a one-degree-of-freedom setup
76 Switching between coexisting stable periodic solutions by impulsive forces with an application to a vibrating plate
77 Analysis of a simplified MEMS oscillator
79 Front propagation in bi-stable non-degenerate systems: model dependence and universality
80 A probabilistic approach towards robust stability optimization, with application to vibration control
81 Pull-in instability of a typical electrostatic MEMS resonator and its suppression by a delayed position feedback
83 Comparison of Moreau-type integrators based on the time finite element discretization of the virtual action
84 Stability of Time-Delay Systems: From Integer-Order to Fractional-Order Systems
85 Worst-case analysis of approximate straight-line motion mechanism with link tolerances and joint clearances
86 On the Influence of Contact Compliance and Stiction on Vibrational Smoothing of Dry Friction
87 On the Dynamics of Friction Based Tuned Mass Dampers
88 A Feasible Analysis of Quasi-Periodic Mathieu Equations via Floquét Theory
88 A Feasible Analysis of Quasi-Periodic Mathieu Equations via Floquét Theory
89 Inertial effects in thermoacoustic subcritical bifurcation
90 Combined Error Estimates for Numerical Continuation of Stochastic Systems
91 Oscillation Patterns in Stochastic Fast-Slow Systems
92 Non-hyperbolic Singularities in Fast-Slow Chemical Oscillators
93 Cooperative Intersection Automation Using Virtual Platoons
95 Experiment and Analysis of Active Vibration Suppression via an Absorber with a Tunable Delay
97 Nonlinear Resonances of a Rigid-Flexible Antenna System
98 Delayed Random Relays

99 On the mathematical justification of viscoelastic shell models
100 Control of mechanical systems with uncertain set-valued friction
101 Effects of an external parameter on the synchronization threshold of time-delayed Hindmarsh-Rose neurons
102 Nonlinear dynamics of a fluid-filled hollow microcantilever subjected to flowing particles
104 Adaptive Control of a Pendulum Using Nonlinear Model Predictive Control
105 Stability Analysis of Machining Processes with Parameter Uncertainty
106 Heave-pitch-roll Nonlinear Dynamics of a Spar Platform
107 Distributed adaptive synchronization control for networked Lagrange system with dynamic friction compensation
108 Cable substructuring with feedback delay
109 Periodic Regimes Caused by Ice-Fluid-Simple Oscillator Interaction
110 Forced and damped solitons in cyclic and symmetric structures
111 Control of multistability in vibro-impact systems
112 Hopf bifurcation in a delayed nonlinear Mathieu equation
113 Transient Responses And Bifurcation Behavior of A Piecewise Smooth Rotor/Stator Rubbing System under Noise Excitation
114 Dynamic release condition for latched curved micro beams
115 Planar Motions in Grinding Chatter
116 Generic Bifurcations at Nonlocal Continua Described by Fractional Calculus
117 Period-1 oscillations of a state-dependent delayed TCP model with PIE queue management policy via High-dimensional Harmonic Balance method
118 Cascade of bifurcations in nonlinear transonic panel flutter oscillations
120 Analysis of Synchronization in Mutually Coupled MEMS Oscillators Via Surface Acoustic Waves Using a Simplified Non-linear Model
121 Seismic performance of base-isolated structures based on the force analogy method
123 Nonlinear Reduced-Order Modeling for Controlled Aeroelastic Systems
124 The threshold behaviour of chaotization phenomenon for multiple frequency perturbations in a cell
126 On the Analysis of Quasi-periodic Systems and a Novel ?Deterministic? Explanation of the Stochastic Resonance Phenomenon
127 Nonequilibrium Response of Solids to Thermal and Mechanical Perturbances of Submicro and Nanosecond Duration
128 Monomolecular reaction networks: flux-influenced sets and balloons
129 Applications of Spectral Submanifolds in Nonlinear Modal Analysis
133 Non-stationary attractors in forced and damped weakly coupled pendulums
134 Differential equations with state-dependent delays - smooth center manifolds and normal forms
135 Robust Maneuver Load Alleviation via LPV Aeroservoelastic Model
136 Prediction of transonic Aerodynamic Forces via nonlinear reduced-order models
137 Fundamental Study On Dynamic Property Of Scissoring Bridge For Disaster Relife
138 Bifurcation Analysis of Non-Smooth Floating Bodies
139 Three-dimensional Energy Channeling in Unit-cell Model Coupled to a Spherical Rotator
142 Stabilization control for self-excited oscillation of cantilevered fluid-conveying pipe
145 Optimal Timing Control Using the Augmented Phase Reduction
148 Nonlinear Dynamics Analysis of a Rotor-Damper System Through Nonlinear Galerkin Method on Approximate Inertial Manifold
149 Homoclinic orbits embedded in one-dimensional invariant manifolds of maps
150 Slow-invariant-manifold resonance capture in vortex-induced vibration of a circular cylinder with a nonlinear dissipative rotator
154 Numerical analysis of a non-linear energy sink (NES) for the parametric excitation of a submerged cylinder
156 Low-dimensional piecewise smooth maps with an unpredictable number of switching manifolds
158 Dynamics of Ball Bearings with Damages at Outer Raceway Surface -Vibration Response under Different Loads
159 Experimental Testing of Rotor-Stator Contact in a Coupled Double Rotor System
160 Stability of positive standard and fractional nonlinear systems

161 Dynamic bifurcations in slow-fast system of neuronal excitability
162 Experimental Tracking of Limit-point Bifurcations using Control-based Continuation
164 Lyapunov stability of measure differential inclusions - applications in nonsmooth mechanics with singular mass matrices
165 A robust-tube MPC approach for the analysis of load response of power plants
166 Computing solution surfaces of quasilinear PDE's by continuation
167 Dynamically Balanced Optimal Gait Generations for the Biped Walking on Stairs Using GA and GA-NN
169 Energy conversion in a dynamic vibro-impact system with dielectric elastomers
172 Non-linear dynamics for contactless characterization of graphene
173 A three field weak formulation for integration of the equations of motion of multibody systems subject to equality constraints
174 Vibrational analogue of coherent quantum Rabi oscillations in a three-body nonlinear mechanical system
175 Hydrodynamics and stochastic dynamics of a parametric pendulum wave energy converter
176 Vibrations of Rotating Composite Blades with Embedded Nonlinear Piezoelectric Elements
177 Statistics of the response of a dry-friction oscillator stochastically excited
178 A solution of the general single contact frictionless problem using tools of b-geometry
179 Recursive Modular Approach for the Modeling and Simulation of a Pipe Conveying Fluid
180 Combined resonance of a nonlocal nanobeam on fractional Pasternak-type viscoelastic foundation
181 Dynamic analysis of a cantilever beam subject to a moving mass under unilateral constraint
182 A nonlinear model for design of beams operating in largely deformed configurations
183 Nonlinear control and stability analysis of a stroke limited inertial actuator in velocity feedback
184 Modal Analysis of Structures in Periodic States
185 Experimental characterisation of tape spring nonlinear compliant mechanisms
190 Tweezer control for chimera states in small networks
193 Computing partial synchronization manifolds of delay-coupled systems
194 Cylindrical Cavity Evolution in a Plane Parallel Potential Flow of the Perfect Incompressible Fluid
196 Chain Fountain Dynamics
197 Forced Resonance Vibrations of the Dissipative Spring-Pendulum System
198 Control of nonlinear localized waves by an external action
199 Symmetry-induced dynamic localization in lattice structures
200 Minimum Damping Needed for Vanishing an Unstable Pocket of a Hill Equation
201 Stochastic sensitivity in dynamic bifurcations with delayed feedback revealed through multiple scales analysis
202 Analysis of stability transitions in a microswimmer with superparamagnetic head
203 On the problem of control resonance oscillations of a mechanical system with unbalanced exciters
204 Computing the viscous fluid flow between moving cylinders of an arbitrary cross-section
205 Time-stepping scheme for mechanical systems with unilateral constraints and time-delays
206 Nonlinear damping types in wake oscillator model for vortex-induced vibrations of 2DOF rigid structure
207 Sympodial fractal structures: tree-inspired concept for biomimetic engineering design
209 Wave Propagation in Nonlinear Implicit Lattices
210 Variety of interfacial patterns in miscible fluids induced by vibrations
211 Energy recovery from a pendulum vibration absorber with a maglev harvester
212 Interaction of period-1 orbits in a dual-frequency driven asymmetric nonlinear oscillator
216 Lagrangian and Eulerian Coherent Structures in Complex Dynamical Systems
217 Analysis of passive wearable spring-clutch device for energy saving during walking
218 Nonlinear Phenomena in AFM Arrays
219 Analysis of Non-Linear Dynamic Behaviours in Asphalt Concrete Pavements Under Temperature Variations
221 Sufficient conditions for convergence of discrete-time Lur'e type systems
223 Homoclinic Chaos near resonances in coupled SQUID
224 Numerical studies on piezoelectric energy harvesting from vortex-induced vibrations

225 A Discrete Predator-Prey Conflict Model with Defense Term
227 Experimental Validation of Vibro-Impact Force Models using Numeric Simulation and Perturbation Methods
228 Simulations in Nonlinear Behavior of an Electrostatically-actuated Corrugated Diaphragm in Microelectromechanical System Tunable Filters
229 Dynamic Control of 3D Directional Drilling Systems with State Estimation
230 String stability for cascaded systems subject to disturbances
232 Dynamic Data-Driven Adaptive Observations in a Vortex Flowfield
233 Nonlinear dynamics of microplate-based imperfect MEMS
234 Parametric vibrations of a rotating thin-walled composite blade subjected to base excitation
235 Analysis of underactuated dynamic locomotion systems using perturbation expansion - the twistcar toy example
237 Fatigue Behavior of Heat-Damaged and FRP Repaired Beams
238 Inherent control error in a multi-PD controlled double inverted pendulum
239 Spectral Submanifolds and Exact Model Reduction for Nonlinear Beam Dynamics
240 Active Vibration Control of a Nonlinear System using Pole Placement
241 Recent Advances in the Theory of Lagrangian Coherent Structures for Three-Dimensional Flows
242 Generalized Fractional Order Reset Element (GFrORE)
243 On the Two Degrees of Freedom Oscillator with Nonlinear Stiffness Coupling: Theoretical and Experiment Results
244 Towards the Adoption of the Stiffness Evaluation Procedure as Non-intrusive, Non-linear Model Reduction Method in Car Crash Simulations
245 Influence of frictional mechanism on chatter vibrations in cutting process
246 Effect of periodic chip formation on the stability of turning processes
247 Nonlinear traffic modeling for urban road network and related robust state estimation
248 An augmented Lagrangian frictional contact formulation for nonsmooth multibody systems
249 Nonlinear Electromechanical Interactions in Rotordynamics of Electrical Machines
250 Effect of Geometric and Material Nonlinearities on the Dynamic Behaviour of PMUTs
252 Modes of vibration of nanobeams vibrating with large displacements and actuated by DC electric tensions
253 Modification of Moreau-Jean?s Scheme for Energy Conservation in Inelastic Impact Dynamics
254 Reduction of Amplitude Fluctuations in Synchronized MEMS-Based Oscillators
255 Beyond complete synchronization of identical systems : multidimentional dynamic consensus
256 On Time-Varying Velocity for an Axially Moving String under Viscous Damping
257 Three to One Internal Resonance of Modes With Different Decay Rates
259 Towards an Optimal Control Framework for Non-Smooth Mechanical Systems
260 Impulsive damping of mechanical systems: periodic solutions and energy harvesting
261 Flow-induced vibration of a D-shape cylinder
262 Regularization of nonsmooth systems using geometric singular perturbation theory and blowup
264 Experiments and Analysis on Nonlinear Vibrations of a Post-buckled Stepped Beam
265 Nonlinear rotordynamic-thermal analysis of micro gas turbines
268 Bifurcation analysis of Nonlinear Normal Modes with the Harmonic Balance Method
270 Effect of Gravity on the Nonlinear Dynamics of an Overhung Rotor with Annular Rubs
271 Mass detection through parametric analysis and symmetry-breaking in a MEMS array
272 Flutter instability of a visco-elastic belt drive
273 Spectrum of an impact oscillator via nonsmooth modal analysis
274 Stabilization of a Multi-Tethered Lighter-Than-Air Rigid-body Sphere Undergoing Vortex-Induced Vibrations in Uniform Flow
275 Experimental Frequency Response Synthesis for Nonlinear Systems
276 Switching to nonhyperbolic cycles from codim-2 bifurcations of equilibria in DDEs
277 Maximum vibration amplitude during run-up of a Jeffcott rotor at parametric anti-resonance
279 Numerical approximation of invariant manifolds for dynamical systems with simultaneous self- and forced excitation
280 Towards Experimental Nonlinear Modal Analysis of Systems with Nonlinear Damping
281 Torsional vibrations in truck powertrains with dual mass flywheel having piecewise linear stiffness

282 Lyapunov stability of a planar rigid body with two frictional point contacts
283 On the family of gradient-free control functions for extremum seeking problems
284 Flutter of Plate in One Side Flow
286 Nonlinear Normal Modes of Coupled van der Pol Oscillators Exhibiting Synchronisation
288 Low-Pass Filter with Hybrid Integrator-Gain Switching for Increased Bandwidth
290 A neutral homoclinic bifurcation in a 3D map
291 Multi-scale Dynamics in Microstructures
292 Comparison between piecewise linear and smooth dynamics: A case study of decomposing a degenerate bifurcation
294 Steady streaming in a vibrating channel with ratchet
295 Passive realization of a nonlinear piezoelectric tuned vibration absorber with a saturable inductor
296 Fluid-Structure Interaction Simulations of Heart Valves with Dynamic Contact
297 Nonlinear Vibration Energy Harvesting Using Piezoelectric Tiles Placed in Stairways
298 On periodic trajectories of a near-Hamiltonian autonomous dynamical system
299 Numerical continuation for edge following in tactile robotics
301 Impact dynamics near unilaterally constrained grazing orbits
302 Non-linear dynamics of opto-thermally excited atomically thin graphene resonators
303 Measurement of backbone curves of a nonlinear piezoelectric cantilever beam
304 Plane motion of the rigid body with the spring-damper suspension
305 Non-classical nonlinear normal vibration modes in mechanical systems
307 Damped Hill?s Equation and its application to attenuate vibrations
308 Non-linear dynamics of a rotor system with compliant seal
309 Nonlinear analysis of the body sway of car-trailer combinations with nonlinear shock absorber and tire characteristics
311 Bistability of a cantilever actuated by fringing electrostatic fields
312 Saturated Adaptive Control of Muscle-like Compliant Manipulation Systems
313 Modeling of controllable support stiffness bio-inspired by tactile sensor systems
315 The NSCD method for dynamic analyses of ancient masonry tower under transversal dynamic loadings
316 Position Control of a Electro-Pneumatic Clutch Using Takagi-Sugeno Techniques
320 1:1 Internal resonance of two transverse modes of a Microbeam using approximate mode shape
322 Interacting global and slow manifolds
323 Modeling of the Dynamics of an Autoparametric System with the Spherical Pendulum
324 Twin canards and MMOs in a chemical reaction model
325 On relative equilibria of a massive point on an uniformly rotating spherical asteroid
326 Analysis of coupled finite-volume/Monte-Carlo methods for plasma edge simulation in fusion reactors
327 Dynamics of a strongly nonlinear mechanical system: a case of dissipation-induced instability
328 Mixed synchronization in a triplet of coupled mechanical oscillators
329 A Multiple Scales Analysis of Very Large-Scale Arrays of Globally Coupled MEMS Resonators
330 Delay system modelling and analysis of a down-hole tool in drilling systems
332 Implicit finite element formulation of the inverse dynamics of vibrating robots
333 Control of a cart with oscillators under uncertainty
334 The impact of non-smoothness in the tyre-force characteristics on the nonlinear dynamics of towed vehicles
337 Control-based continuation of unstable pedestrian flows
338 Motion Planning Problem for a Finite-Dimensional Approximation of the Navier-Stokes Equations
340 Vibration-based energy harvesting via a bistable system: experimental study
342 Non-linear dynamics of a heavy mass particle and rolling ball along curvilinear trace of series of circle arcs: Phase trajectory portraits, some analogies and vibro-impacts
343 Energy method applied to the asymptotic methods of Non-linear mechanics
345 Experimental Investigation of The Friction-Induced Instabilities at the Origin of Wet Belt Squeal
346 Direct antiresonance continuation for non linear dynamic absorbers
347 Different models for balancing using accelerometer

348 Nonlinear Dynamics of Oscillators with Shape Memory Alloy
349 Exact Model Reduction for a von Kármán beam
351 Nonlinear System Identification of a Beam with Magnetic Restoring Forces
353 Feedback PDalpha type Iterative Learning Control for Fractional-Order Human Arm-Support Nonlinear System
354 Particle Filters with Nudging in Multiscale Chaotic Systems: with Application to the Lorenz-96 Atmospheric Model
356 A numerical study of elastic Fano resonances in degeneracy-broken trapped mode resonators for biosensing applications
357 Path-based measures of transport and expansion rates in stochastic flows
358 Room-Temperature Stochastic Switching in a Duffing Graphene Resonator
359 Delay-Independent Partial Synchronization in Networks of Non-identical Nonlinear Systems with Transmission Delay Coupling
360 Probabilistic Quantification of Extreme Events in Complex Systems
361 Stability and Control of the Fractional Damped Delayed Mathieu Equation
362 The Discretized Coulomb Friction Model in a Non-Singular Complementarity Formulation for Multibody Systems with Contacts
363 Chaos Control in Fractional-order Systems Using Fractional Chebyshev Collocation Method
364 Parameter Sensitivity in Experimental Wave Propagation Studies with Beam like Structures: Shadow of Chaotic Scattering in Continuum Structural Dynamics?
365 The influence of imperfections on the spatio-temporal dynamics of a parametrically excited nonlinear viscoelastic micro-beam-string
366 Folding tori and Chenciner bubbles in an ENSO model with delayed feedback
367 Extraction and Prediction of Coherent Patterns in Incompressible Flows through Space-Time Koopman Analysis
368 Frictional passive damping in a beam on foundation under moving loads
369 Post-critical vibrations in an auto-resonant axial-torsional vibratory drilling system
371 Experimental Studies with Drill String: Effects of Drill Mud
372 Analysis of oscillatory motions of chromosomes during anaphase using biomechanical oscillatory model of mitotic spindle
373 Control of amplitude chimeras by time delay in dynamical networks
374 Differential positivity for nonlinear consensus
375 Stability of amplitude chimeras in oscillator networks
376 Embedded Construction of Adjoint Equations for Optimization using Continuation
377 Preloading in Nonlinear Oscillator
378 Demonstration of Electrostatic MEMS Bifurcation Sensors
379 Global manifolds parametrised by isochrons
380 Synchronisation of beams attached to a rotating hub
381 Parametrically excited inertial sensors
382 Bifurcations in implicit map - application to Surface Location Error in milling processes
384 Runout in milling: Tiny cause with significant effects
385 Modal Asymptotic and Numerical Analysis of Sub-harmonic and Quasi- periodic Vibrations of Beams with one and two cracks
386 The emergence and breaking of synchrony in networks of dynamical systems
387 Locomotion conditions for a two-body system on a rough inclined plane
390 Nonlinear Normal Modes of Free and Forced Nonlinear Torsional Vibrations of Piecewise Linear Systems
392 A nonlinear tuned vibration absorber for chatter mitigation
393 Uncovering detached resonance curves in single degree-of-freedom systems
395 Compensating symmetry breaking in planetary gearboxes by means of tooth profile modifications
396 Analysis of a remarkable singularity in a nonlinear DDE
397 Robust Dynamic Vehicle Routing for On-Demand Systems under Light Load
398 Artificial Potential Functions for Control of Automated Vehicles
399 On the Dynamics of Dimpled Electrostatic MEMS Actuators
401 Modelling and control of a simplified Traveling system under temperature variation

402 Experimental Nonlinear Phenomena in Structures with Multiple Equilibria Controlled by Boundary Displacements: Ultra-fast Decay of Coupled Vibrations
404 Nonlinear Characteristics of Hunting Motion of a Railway Wheel Set By Using a Roller Rig
405 Finding periodic solutions in the dynamics of metal cutting via averaging
406 Experimental analysis of a rotor system with two-phase flow squeeze film dampers under low supply pressure
408 Expert stick balancing: Levy distributions and the edge of stability
410 Building a test equipment for measuring chaotic behaviour in a frictional oscillator
411 Three-segmented hopping leg for the analysis of human running locomotion
414 Experimental and Numerical Study of Nonlinear Galloping oscillations Interfering with Vortex-Induced Excitation
416 Dynamics in Milling Pocket Structures
417 Identification Of Nonlinear Damping For Large-Amplitude Vibrations Of Plates And Shells
418 Dynamics Of Statically Pre-Loaded Human Aorta With Residual Stresses
419 Nonlinear Random Vibrations of Stretched Beam Discretized by Finite Difference Scheme and Excited by Gaussian White Noise
420 Nonlinear model identification and spectral submanifolds for multi-degree-of-freedom mechanical vibrations
421 Motion Control of a Flexible Underactuated Manipulator by Using High-Frequency Excitation
422 Passive/active thermal dynamics in the coupled nonlinear vibrations of laminated plates
424 Energy transport and localization in the system of harmonically coupled pendulums
425 Optimization of Planetary Gear Systems
426 Delayed Tyre Model in Vehicle Shimmy
428 Small-scale counter-rotating Darrieus wind turbine
429 Approximation of Top Lyapunov Exponent of Stochastic Delayed Turning Model Using Fokker-Planck Approach
430 Balancing on accelerating skateboard
431 Accuracy enhancement of predicted stability lobes when applying the upgraded model of regenerative chatter vibrations in milling to large diameter cutters
432 Fractional Order PI Gimbal Control
434 Tracking critical points on evolving curves and surfaces
435 Direct and Parametric Entrainment of a Graphene Oscillator
436 Dynamics and fracture of impacted sandwich composites under time varying loads: Numerical modelling and simulations
439 Non-reverse Motion of a Two-body System along a Straight Line on a Rough Horizontal Plane
440 Discontinuous dynamics of wheels with a towed axis
441 Multiscale Methods and Inverse Problems in Modelling of Intracellular Processes
442 Effect of Softening Constitutive Law on Column Buckling
443 Parameter estimation for nonsymmetric matrix Riccati differential equations
444 Semi-analytical investigation of unsteady free-boundary flows
446 Simplified model of rocking suitcases
447 Galerkin approximations for the Pole placement of time delayed systems
448 Wrinkling patterns of thin films under finite membrane strain
449 Perturbation Analysis on the Dynamic Behaviours of Planetary Gear Sets with Friction
451 Continuation of periodic orbits in symmetric conservative systems: an application to the planar 2k+1 body problem
452 A Modified Two-Timescale Incremental Harmonic Balance Method for Steady-State Quasi-Periodic Responses of Nonlinear Systems
453 Set Oriented Numerical Methods for Spatially Dependent Parameter Uncertainty
455 Dynamics of the basketball rolling along the rim
456 Forced Vibrations of a String in the Presence of a Smooth Unilateral Obstacle
457 Experimental Identification of an Aircraft Piccolo Tube Exhibiting Nonsmooth Nonlinearities
459 Nonlinear material modelling of an airsoft pellet applied for impulse excitation
460 Predictive control of robot manipulators with flexible joint
461 Experimental study of noise reduction using an hybrid electro-acoustic NES

462 Hopf Bifurcation in a Nonlinear Mechanical Model of Human Balancing with Delayed PDA Control
464 Passive vibration control with a bistable nonlinear absorber
465 On the Effect of the Deformed State of a Tire on the Combined Wheel's Rolling, Sliding, and Spinning with Dry Friction
466 A Mechanistic Ploughing Model for Chatter Magnitude Limitation in Thin-Walled Parts Turning
469 Harmonic balance method with iterative frequency technique for nonlinear oscillators
470 Stationary and Non-stationary Dynamics of the Parametric Pendulum
471 Convergence of equation-free methods in the case of finite time scale separation with applications to deterministic and stochastic systems
473 Improved Theory of the Combined Dry Friction in Problems of Pneumatics? Dynamics
476 Vibration decay and positioning time of sampled-data systems with dry friction
477 Non-smooth torus to identify domain of attraction of stable milling processes
478 Vibration-based testing of bolted joints
479 On Dynamics of a ParticleTethered to aRigid Body by Two Unilateral Constraints
480 Inertia Properties and Their Role in Haptic Rendering
481 Proper Orthogonal Decomposition Analysis of Impact-Induced Dynamics of the Olive Tree Branch: A Paradigm of a Complex Soft-Stiff Structure in Biomechanics
482 Regularization, piecewise smooth systems and the Painlevé paradox
483 Modelling and simulation of vibrocompaction processes
484 Parametric study of the force acting on a target during an aircraft impact
485 Borehole Spiraling as Limit Cycle of Directionally Unstable Drilling Systems
486 Stability of Capillary Waves of Finite Amplitude
487 Linear Flows in the Rapid Distortion Limit: Dynamical Systems Analysis of the Kelvin-Townsend Equations
488 Stability and Vibration Amplitude of the Quasi Periodic Delayed Mathieu Equation wiht Frequeny-Modulated Coefficinets
489 2D Control of Energy Transport in the Locally Resonant Unit Cell Model with Self Excitation
490 Model reduction for mercury porosimetry: invasion percolation on regular, exotic and random networks
491 A Chaotic Linear Operator on the Space of Odd 2??Periodic Functions
492 Energy Harvesting from Vortex Induced Vibration using Period-1 Rotation of Parametric Pendulum
493 Robustness of coherent sets computations
495 Advantages of Alpha-Stable Distribution fits for Dynamic Responses of Nonlinear Structures subjected to Random Excitations
496 Analysis of traffic data by considering nonlinearity and nonstationarity
497 Vibratory Forces and Some Phenomena?s of Their Action
499 Frequency Response of P-Mode Intrinsic Localized Mode
500 Solution of Scale Dynamic Systems
501 Extreme Response Mitigation of Stochastically Forced Nonlinear Structures
502 Dynamics of a Small Stiff Spherical Particle in an Acoustic Standing Wave in Fluid
504 Nonholonomic lane change maneuvers for connected and autonomous vehicles
505 The role of vibrations in tactile perception
506 Slow-Fast Hamiltonian Systems: Dynamics and Bifurcations
507 Analysis of dry galloping on inclined cables under stationary wind
508 Parametric Excitation and Detection of Electrostatic MEMS Actuators
509 On the seismic damage in historical building archetypes
510 Intermittent delay feedback control as an origin of physiological movement variability
511 Autoresonant excitation and control of parametric vibration
512 Parametric resonance of a nonlinear energy harvester for torsional vibrations
513 NumericalMethodforNonlinearVibrationofContactJointStructures
514 Analytical studies of a two degree-of-freedom vibro-impact system
515 Intermittent Oscillations of Elastic structure in Fluctuating Axial Fluid Flow
517 Uncertainty Quantification and Response Reliability for a Nonlinear Resonant MEMS T-beam Structure Undergoing 1:2 Autoparametric Resonance

518 Drillingdynamicsunder1:1internalresonancebetweenaxialandtorsionalmodes
521 Numerical solving unsteady space-fractional problems
522 Dynamical response identification of a class of nonlinear hysteretic systems
523 Towards a bifurcation theory for random dynamical systems
528 The Existence of Extremal Solutions for a Coupled System of Nonlinear Fractional Integro-Differential Equations
526 Hyperbolic periodic orbits in nongradient systems and small-noise-induced metastable transitions
530 Linearizability Condition of Nonlinear form of Riccati equation
531 New driver assistance functions for commercial vehicles

List of Papers by Mini-Symposia, in order of presentation

Reduced-Order Modeling and System Identification

- Nonlinear Reduced-Order Modeling for Controlled Aeroelastic Systems (123)
- Prediction of transonic Aerodynamic Forces via nonlinear reduced-order models (136)
- Particle Filters with Nudging in Multiscale Chaotic Systems: with Application to the Lorenz-96 Atmospheric Model (354)
- Experimental Identification of an Aircraft Piccolo Tube Exhibiting Nonsmooth Nonlinearities (457)
- Model reduction for mercury porosimetry: invasion percolation on regular, exotic and random networks (490)
- Towards the Adoption of the Stiffness Evaluation Procedure as Non-intrusive, Non-linear Model Reduction Method in Car Crash Simulations (244)
- Experimental Frequency Response Synthesis for Nonlinear Systems (275)
- Towards Experimental Nonlinear Modal Analysis of Systems with Nonlinear Damping (280)
- Reduced-order Modeling of Strongly Nonlinear Systems Using Measured Time Series (65)
- Applications of Spectral Submanifolds in Nonlinear Modal Analysis (129)
- Parameter estimation for nonsymmetric matrix Riccati differential equations (443)
- Linearizability Condition of Nonlinear form of Riccati equation (530)

Asymptotic Methods

- Non-stationary attractors in forced and damped weakly coupled pendulums (133)
- Vibrational analogue of coherent quantum Rabi oscillations in a three-body nonlinear mechanical system (174)
- On periodic trajectories of a near-Hamiltonian autonomous dynamical system (298)
- Plane motion of the rigid body with the spring-damper suspension (304)
- Stationary and Non-stationary Dynamics of the Parametric Pendulum (470)
- Analytical studies of a two degree-of-freedom vibro-impact system (514)
- On perturbations methods and their applicability in the study of vibrations of axially moving strings and beams (19)
- On the mathematical justification of viscoelastic shell models (99)
- On Time-Varying Velocity for an Axially Moving String under Viscous Damping (256)
- Small-scale counter-rotating Darrieus wind turbine (428)
- Semi-analytical investigation of unsteady free-boundary flows (444)
- Control of nonlinear localized waves by an external action (198)
- Forced Resonance Vibrations of the Dissipative Spring-Pendulum System (197)
- Energy method applied to the asymptotic methods of Non-linear mechanics (343)
- Energy transport and localization in the system of harmonically coupled pendulums (424)
- 2D Control of Energy Transport in the Locally Resonant Unit Cell Model with Self Excitation (489)
- Stochastic Asymptotic-preserving Galerkin methods for multiscale kinetic equations with uncertainties (6)

Computational Methods

- Computing solution surfaces of quasilinear PDE's by continuation (166)
- Bifurcation analysis of Nonlinear Normal Modes with the Harmonic Balance Method (268)
- Control-based continuation of unstable pedestrian flows (337)
- Embedded Construction of Adjoint Equations for Optimization using Continuation (376)
- Tracking critical points on evolving curves and surfaces (434)
- Continuation of periodic orbits in symmetric conservative systems: an application to the planar 2k+1 body problem (451)
- Topological changes in slow-fast systems: chaotic neuron models (63)
- Differential equations with state-dependent delays - smooth center manifolds and normal forms (134)
- Numerical approximation of invariant manifolds for dynamical systems with simultaneous self- and forced excitation (279)
- A neutral homoclinic bifurcation in a 3D map (290)
- Homoclinic orbits embedded in one-dimensional invariant manifolds of maps (149)
- Global manifolds parametrised by isochrons (379)
- Capturing similarity solutions in multidimensional Burgers' equation (69)
- Differential positivity for nonlinear consensus (374)
- Nonlinear model identification and spectral submanifolds for multi-degree-of-freedom mechanical vibrations (420)
- Harmonic balance method with iterative frequency technique for nonlinear oscillators (469)
- Robustness of coherent sets computations (493)
- Numerical Study on the Waveform Evolution in Metal Material (40)
- Cylindrical Cavity Evolution in a Plane Parallel Potential Flow of the Perfect Incompressible Fluid (194)
- Lagrangian and Eulerian Coherent Structures in Complex Dynamical Systems (216)
- Recent Advances in the Theory of Lagrangian Coherent Structures for Three-Dimensional Flows (241)
- Analysis of coupled finite-volume/Monte-Carlo methods for plasma edge simulation in fusion reactors (326)
- Extraction and Prediction of Coherent Patterns in Incompressible Flows through Space-Time Koopman Analysis (367)
- An Asymptotic-Preserving Stochastic Galerkin Method for the Semiconductor Boltzmann Equation with Random Inputs and Diffusive Scalings (7)
- Fractional order convergence of time-discretizations for semilinear PDEs (61)
- Combined Error Estimates for Numerical Continuation of Stochastic Systems (90)
- Path-based measures of transport and expansion rates in stochastic flows (357)
- Probabilistic Quantification of Extreme Events in Complex Systems (360)
- Set Oriented Numerical Methods for Spatially Dependent Parameter Uncertainty (453)

Experiments in Nonlinear Dynamics and Control

- Model Free Control of a 2-Input and 2-Output Helicopter System (17)
- Chaotic triangle wave generator implementing Chua circuit towards DC/DC converter control (31)
- Experimental Testing of Rotor-Stator Contact in a Coupled Double Rotor System (159)
- Measurement of backbone curves of a nonlinear piezoelectric cantilever beam (303)
- Parametric Excitation and Detection of Electrostatic MEMS Actuators (508)
- Data preparation for execution of experiments on rigid body motion in a resisting medium (48)
- Adaptive Control of a Pendulum Using Nonlinear Model Predictive Control (104)
- Experimental characterisation of tape spring nonlinear compliant mechanisms (185)
- Nonlinear Characteristics of Hunting Motion of a Railway Wheel Set By Using a Roller Rig (404)
- Dynamical response identification of a class of nonlinear hysteretic systems (522)
- Experimental Tracking of Limit-point Bifurcations using Control-based Continuation (162)

- Experiments and Analysis on Nonlinear Vibrations of a Post-buckled Stepped Beam (264)
- Numerical continuation for edge following in tactile robotics (299)
- Nonlinear System Identification of a Beam with Magnetic Restoring Forces (351)
- Vibration-based testing of bolted joints (478)
- Stabilization control for self-excited oscillation of cantilevered fluid-conveying pipe (142)
- Experimental analysis of a rotor system with two-phase flow squeeze film dampers under low supply pressure (406)

Slow-Fast Systems and Phenomena

- Non-hyperbolic Singularities in Fast-Slow Chemical Oscillators (92)
- Effect of periodic chip formation on the stability of turning processes (246)
- Interacting global and slow manifolds (322)
- Dynamics of a Small Stiff Spherical Particle in an Acoustic Standing Wave in Fluid (502)
- Convergence of equation-free methods in the case of finite time scale separation with applications to deterministic and stochastic systems (471)
- Dynamic bifurcations in slow-fast system of neuronal excitability (161)
- Multi-scale Dynamics in Microstructures (291)
- The Painlevé paradox and blowup part I (262)
- The Painlevé paradox and blowup part II (482)
- Slow-Fast Hamiltonian Systems: Dynamics and Bifurcations (506)
- Twin canards and MMOs in a chemical reaction model (324)
- Exact Model Reduction for a von Kármán beam (349)
- Motion Control of a Flexible Underactuated Manipulator by Using High-Frequency Excitation (421)
- The Existence of Extremal Solutions for a Coupled System of Nonlinear Fractional Integro-Differential Equations (528)

Fractional Derivatives

- Fractional-Order Controller Design Based on the Nyquist Diagram for the Vibration Control of a Flexible Beam (59)
- Chaos Control in Fractional-order Systems Using Fractional Chebyshev Collocation Method (363)
- Numerical solving unsteady space-fractional problems (521)
- Calculus on Smith-Volterra-Cantor sets (2)
- Fractional Order PI Gimbal Control (432)
- Feedback PDalpha type Iterative Learning Control for Fractional-Order Human Arm-Support Nonlinear System (353)
- Contributions of the pool of long-lived chronically infected CD4+ T cells in HIV dynamics: a fractional-order approach (9)
- Generic Bifurcations at Nonlocal Continua Described by Fractional Calculus (116)
- Stability of positive standard and fractional nonlinear systems (160)
- Combined resonance of a nonlocal nanobeam on fractional Pasternak-type viscoelastic foundation (180)
- Generalized Fractional Order Reset Element (GFrORE) (242)

Dynamics and Optimization of Multibody Systems

- Rigidity constraints in Analytical Mechanics. (5)
- Two-dimensional motion of a body carrying movable internal masses (60)
- A three field weak formulation for integration of the equations of motion of multibody systems subject to equality constraints (173)
- The Discretized Coulomb Friction Model in a Non-Singular Complementarity Formulation for Multibody Systems with Contacts (362)
- Locomotion conditions for a two-body system on a rough inclined plane (387)

- Non-reverse Motion of a Two-body System along a Straight Line on a Rough Horizontal Plane (439)
- Selected aspects involved in dynamics and optimization of cranes with a pivoting boom (15)
- Model of Person Balancing on the Seesaw (16)
- Dynamically Balanced Optimal Gait Generations for the Biped Walking on Stairs Using GA and GA-NN (167)
- Chain Fountain Dynamics (196)
- Analysis of passive wearable spring-clutch device for energy saving during walking (217)
- Analysis of underactuated dynamic locomotion systems using perturbation expansion - the twistcar toy example (235)
- Torsional vibration damper design using Augmented Lagrangian Particle Swarm Optimization (45)
- Distributed adaptive synchronization control for networked Lagrange system with dynamic friction compensation (107)
- Control of a cart with oscillators under uncertainty (333)
- Predictive control of robot manipulators with flexible joint (460)
- Inertia Properties and Their Role in Haptic Rendering (480)
- Dynamics of the basketball rolling along the rim (455)

Nonlinear Phenomena in Mechanical and Structural Systems

- Irregular dynamics of an elliptic vortex in an oscillatory nonlinear flow (18)
- Heave-pitch-roll Nonlinear Dynamics of a Spar Platform (106)
- Steady streaming in a vibrating channel with ratchet (294)
- Bifurcations in implicit map - application to Surface Location Error in milling processes (382)
- Nonlinear Resonances of a Rigid-Flexible Antenna System (97)
- Inherent control error in a multi-PD controlled double inverted pendulum (238)
- Modes of vibration of nanobeams vibrating with large displacements and actuated by DC electric tensions (252)
- Experimental Investigation of The Friction-Induced Instabilities at the Origin of Wet Belt Squeal (345)
- Experimental Nonlinear Phenomena in Structures with Multiple Equilibria Controlled by Boundary Displacements: Ultra-fast Decay of Coupled Vibrations (402)
- Frequency Response of P-Mode Intrinsic Localized Mode (499)
- Analysis of dry galloping on inclined cables under stationary wind (507)
- Experimental Validation of Vibro-Impact Force Models using Numeric Simulation and Perturbation Methods (227)
- Parametric vibrations of a rotating thin-walled composite blade subjected to base excitation (234)
- Modeling of the Dynamics of an Autoparametric System with the Spherical Pendulum (323)
- Dynamics of a strongly nonlinear mechanical system: a case of dissipation-induced instability (327)
- Parametrically excited inertial sensors (381)
- Homoclinic Chaos near resonances in coupled SQUID (223)
- Experimental Studies with Drill String: Effects of Drill Mud (371)
- Experimental and Numerical Study of Nonlinear Galloping oscillations Interfering with Vortex-Induced Excitation (414)
- Nonlinear Dynamics Analysis of a Rotor-Damper System Through Nonlinear Galerkin Method on Approximate Inertial Manifold (148)
- Nonlinear Electromechanical Interactions in Rotordynamics of Electrical Machines (249)
- Effect of Softening Constitutive Law on Column Buckling (442)
- Finding periodic solutions in the dynamics of metal cutting via averaging (405)
- Perturbation Analysis on the Dynamic Behaviours of Planetary Gear Sets with Friction (449)
- Passive/active thermal dynamics in the coupled nonlinear vibrations of laminated plates (422)
- Dynamics and fracture of impacted sandwich composites under time varying loads: Numerical modelling and simulations (436)

- Wrinkling patterns of thin films under finite membrane strain (448)
- Nonlinear material modelling of an airsoft pellet applied for impulse excitation (459)
- Uncovering detached resonance curves in single degree-of-freedom systems (393)
- Spectral Submanifolds and Exact Model Reduction for Nonlinear Beam Dynamics (239)
- On relative equilibria of a massive point on an uniformly rotating spherical asteroid (325)
- A Modified Two-Timescale Incremental Harmonic Balance Method for Steady-State Quasi-Periodic Responses of Nonlinear Systems (452)
- The threshold behaviour of chaotization phenomenon for multiple frequency perturbations in a cell (124)
- Compensating symmetry breaking in planetary gearboxes by means of tooth profile modifications (395)
- Fatigue Behavior of Heat-Damaged and FRP Repaired Beams (237)

Nonlinear Dynamics in Engineering Systems

- Response Regimes in Equivalent Mechanical Model of Weakly Nonlinear Liquid Sloshing (33)
- Inertial effects in thermoacoustic subcritical bifurcation (89)
- Bifurcation Analysis of Non-Smooth Floating Bodies (138)
- Flutter instability of a visco-elastic belt drive (272)
- Motion Planning Problem for a Finite-Dimensional Approximation of the Navier-Stokes Equations (338)
- Forced Vibrations of a String in the Presence of a Smooth Unilateral Obstacle (456)
- On the Dynamics of Friction Based Tuned Mass Dampers (87)
- On the Effect of the Deformed State of a Tire on the Combined Wheel's Rolling, Sliding, and Spinning with Dry Friction (465)
- Improved Theory of the Combined Dry Friction in Problems of Pneumatics Dynamics (473)
- Vibration decay and positioning time of sampled-data systems with dry friction (476)
- Numerical Method for Nonlinear Vibration of Contact Joint Structures (513)
- Forced and damped solitons in cyclic and symmetric structures (110)
- On the family of gradient-free control functions for extremum seeking problems (283)
- Non-classical nonlinear normal vibration modes in mechanical systems (305)
- Preloading in Nonlinear Oscillator (377)
- Modal Asymptotic and Numerical Analysis of Sub-harmonic and Quasi- periodic Vibrations of Beams with one and two cracks (385)
- Nonlinear Normal Modes of Free and Forced Nonlinear Torsional Vibrations of Piecewise Linear Systems (390)
- Dynamics of Ball Bearings with Damages at Outer Raceway Surface -Vibration Response under Different Loads (158)
- Nonlinear rotordynamic-thermal analysis of micro gas turbines (265)
- Torsional vibrations in truck powertrains with dual mass flywheel having piecewise linear stiffness (281)
- Non-linear dynamics of a rotor system with compliant seal (308)
- Non-linear dynamics of a heavy mass particle and rolling ball along curvilinear trace of series of circle arcs: Phase trajectory portraits, some analogies and vibro-impacts (342)
- Evaluating Nonlinear Responses of Asphalt Concrete Mixtures under Time-Dependent Loading: in view of three representation functions (22)
- Vibration localization and snaking bifurcations in a purely mechanical system (46)
- Nonlinear Phenomena in AFM Arrays (218)
- Saturated Adaptive Control of Muscle-like Compliant Manipulation Systems (312)
- Analysis of a remarkable singularity in a nonlinear DDE (396)
- Identification Of Nonlinear Damping For Large-Amplitude Vibrations Of Plates And Shells (417)
- On Dynamics of a ParticleTethered to a Rigid Body by Two Unilateral Constraints (479)
- Modelling and simulation of vibrocompaction processes (483)
- Vibratory Forces and Some Pheomena's of Their Action (497)
- Transient Responses And Bifurcation Behavior of A Piecewise Smooth Rotor/Stator Rubbing System under Noise Excitation (113)
- Building a test equipment for measuring chaotic behaviour in a frictional oscillator (410)

Non-Smooth Dynamics

- Control of a vertical mode of a cable by a nonsmooth oscillator (38)
- Investigation of the dynamics of the wiper blade around the reversal (58)
- Dynamic analysis of a cantilever beam subject to a moving mass under unilateral constraint (181)
- Towards an Optimal Control Framework for Non-Smooth Mechanical Systems (259)
- Nonlinear Dynamics of Oscillators with Shape Memory Alloy (348)
- On the Dynamics of Dimpled Electrostatic MEMS Actuators (399)
- Anisotropic dry friction with non-convex force reservoirs: modeling and experiments (73)
- An augmented Lagrangian frictional contact formulation for nonsmooth multibody systems (248)
- Lyapunov stability of a planar rigid body with two frictional point contacts (282)
- Frictional passive damping in a beam on foundation under moving loads (368)
- Discontinuous dynamics of wheels with a towed axis (440)
- Analysis of Pivoting Algorithms for LCPs in Redundant Contact Dynamics (42)
- Comparison of Moreau-type integrators based on the time finite element discretization of the virtual action (83)
- Worst-case analysis of approximate straight-line motion mechanism with link tolerances and joint clearances (85)
- Time-stepping scheme for mechanical systems with unilateral constraints and time-delays (205)
- Modification of Moreau-Jean's Scheme for Energy Conservation in Inelastic Impact Dynamics (253)
- Impact dynamics near unilaterally constrained grazing orbits (301)
- Low-dimensional piecewise smooth maps with an unpredictable number of switching manifolds (156)
- Lyapunov stability of measure differential inclusions - applications in nonsmooth mechanics with singular mass matrices (164)
- A solution of the general single contact frictionless problem using tools of b-geometry (178)
- Spectrum of an impact oscillator via nonsmooth modal analysis (273)
- Comparison between piecewise linear and smooth dynamics: A case study of decomposing a degenerate bifurcation (292)
- Fluid-Structure Interaction Simulations of Heart Valves with Dynamic Contact (296)

Systems with Time Delay

- Control of amplitude chimeras by time delay in dynamical networks (373)
- Delay-Differential Equations Applied to Queueing Theory (62)
- Folding tori and Chenciner bubbles in an ENSO model with delayed feedback (366)
- Period-1 oscillations of a state-dependent delayed TCP model with PIE queue management policy via High-dimensional Harmonic Balance method (117)
- Optimization Criterions of a Multi-Time-Delay Controlled Isolation System with Asymmetrical Nonlinearity (51)
- Galerkin approximations for the Pole placement of time delayed systems (447)
- An Online Control Strategy for Time Delayed Vibration Absorber (50)
- A probabilistic approach towards robust stability optimization, with application to vibration control (80)
- Experiment and Analysis of Active Vibration Suppression via an Absorber with a Tunable Delay (95)
- Cable substructuring with feedback delay (108)
- A nonlinear tuned vibration absorber for chatter mitigation (392)
- Stability Analysis of Machining Processes with Parameter Uncertainty (105)
- Influence of frictional mechanism on chatter vibrations in cutting process (245)
- Runout in milling: Tiny cause with significant effects (384)
- Dynamics in Milling Pocket Structures (416)

- Accuracy enhancement of predicted stability lobes when applying the upgraded model of regenerative chatter vibrations in milling to large diameter cutters (431)
- A Mechanistic Ploughing Model for Chatter Magnitude Limitation in Thin-Walled Parts Turning (466)
- Stochastic sensitivity in dynamic bifurcations with delayed feedback revealed through multiple scales analysis (201)
- Delayed Random Relays (98)
- On some extension of center manifold method (4)
- Switching to nonhyperbolic cycles from codim-2 bifurcations of equilibria in DDEs (276)
- Non-smooth torus to identify domain of attraction of stable milling processes (477)
- Stability of Time-Delay Systems: From Integer-Order to Fractional-Order Systems (84)
- Intermittent delay feedback control as an origin of physiological movement variability (510)
- Delayed Tyre Model in Vehicle Shimmy (426)
- Balancing on accelerating skateboard (430)
- Hopf Bifurcation in a Nonlinear Mechanical Model of Human Balancing with Delayed PDA Control (462)
- Solution of Scale Dynamic Systems (500)
- Borehole Spiraling as Limit Cycle of Directionally Unstable Drilling Systems (485)
- Delay system modelling and analysis of a down-hole tool in drilling systems (330)
- Post-critical vibrations in an auto-resonant axial-torsional vibratory drilling system (369)
- Axial and torsional dynamics of a distributed drill string system (29)
- Drilling dynamics under 1:1 internal resonance between axial and torsional modes (518)
- Planar Motions in Grinding Chatter (115)
- Different models for balancing using accelerometer (347)

Micro- and Nano-Electro-Mechanical Systems

- Parametric Amplification of Acoustically-Excited Micromechanical Oscillators Using Fringing Electrostatic Fields (25)
- Room-Temperature Stochastic Switching in a Duffing Graphene Resonator (358)
- The influence of imperfections on the spatio-temporal dynamics of a parametrically excited nonlinear viscoelastic micro-beam-string (365)
- A Degenerate Mode Magnetic Acoustic Resonator (72)
- Uncertainty Quantification and Response Reliability for a Nonlinear Resonant MEMS T-beam Structure Undergoing 1:2 Autoparametric Resonance (517)
- Devil's Staircase in an Optomechanical Cavity (64)
- Analysis of a simplified MEMS oscillator (77)
- Dynamic release condition for latched curved micro beams (114)
- Nonlinear dynamics of microplate-based imperfect MEMS (233)
- Pull-in instability of a typical electrostatic MEMS resonator and its suppression by a delayed position feedback (81)
- Simulations in Nonlinear Behavior of an Electrostatically-actuated Corrugated Diaphragm in Microelectromechanical System Tunable Filters (228)
- Effect of Geometric and Material Nonlinearities on the Dynamic Behaviour of PMUTs (250)
- Reduction of Amplitude Fluctuations in Synchronized MEMS-Based Oscillators (254)
- Three to One Internal Resonance of Modes With Different Decay Rates (257)
- Mass detection through parametric analysis and symmetry-breaking in a MEMS array (271)
- Non-linear dynamics of opto-thermally excited atomically thin graphene resonators (302)
- Bistability of a cantilever actuated by fringing electrostatic fields (311)
- 1:1 Internal resonance of two transverse modes of a Microbeam using approximate mode shape (320)
- A Multiple Scales Analysis of Very Large-Scale Arrays of Globally Coupled MEMS Resonators (329)
- Demonstration of Electrostatic MEMS Bifurcation Sensors (378)
- Direct and Parametric Entrainment of a Graphene Oscillator (435)

Nonlinear Dynamics in Biological Systems

- Waves in Biomembranes with Amplitude-Dependent Nonlinearities (14)
- An Influence of Nonlinearity and Discontinuity on Sound Transfer in Reconstructed Middle Ear (52)
- Monomolecular reaction networks: flux-influenced sets and balloons (128)
- Modeling of controllable support stiffness bio-inspired by tactile sensor systems (313)
- Analysis of oscillatory motions of chromosomes during anaphase using biomechanical oscillatory model of mitotic spindle (372)
- Dynamics Of Statically Pre-Loaded Human Aorta With Residual Stresses (418)
- Izhikevich Neural Networking Model (35)
- Expert stick balancing: Levy distributions and the edge of stability (408)
- Three-segmented hopping leg for the analysis of human running locomotion (411)
- Proper Orthogonal Decomposition Analysis of Impact-Induced Dynamics of the Olive Tree Branch: A Paradigm of a Complex Soft-Stiff Structure in Biomechanics (481)
- The role of vibrations in tactile perception (505)
- Periodic orbits of a neuron model with periodic internal decay rate. (3)

Nonlinear Dynamics for Engineering Design

- Asynchronous modes of vibration in a heavy-chain model with linear and rotational springs (30)
- Seismic performance of base-isolated structures based on the force analogy method (121)
- Fundamental Study On Dynamic Property Of Scissoring Bridge For Disaster Relife (137)
- On the Two Degrees of Freedom Oscillator with Nonlinear Stiffness Coupling: Theoretical and Experiment Results (243)
- The NSCD method for dynamic analyses of ancient masonry tower under transversal dynamic loadings (315)
- On the seismic damage in historical building archetypes (509)
- An anisometric dynamical integrity measure and its seamless variation with respect to other measures (49)
- Hydrodynamics and stochastic dynamics of a parametric pendulum wave energy converter (175)
- A nonlinear model for design of beams operating in largely deformed configurations (182)
- Parametric study of the force acting on a target during an aircraft impact (484)
- Nonlinear Vibrations Of Functionally Graded Shallow Shells Of A Complex Planform In Thermal Environments (70)
- Nonlinear dynamics of a fluid-filled hollow microcantilever subjected to flowing particles (102)
- Numerical analysis of a non-linear energy sink (NES) for the parametric excitation of a submerged cylinder (154)
- Non-linear dynamics for contactless characterization of graphene (172)
- Sympodial fractal structures: tree-inspired concept for biomimetic engineering design (207)
- Analysis of Non-Linear Dynamic Behaviours in Asphalt Concrete Pavements Under Temperature Variations (219)
- Vibrations of Rotating Composite Blades with Embedded Nonlinear Piezoelectric Elements (176)
- Effect of Gravity on the Nonlinear Dynamics of an Overhung Rotor with Annular Rubs (270)
- A Generalised Nonlinear Isolator-Elastic Beam Interaction Analysis for Extremely Low or High Supporting Frequency (44)
- Maximum vibration amplitude during run-up of a Jeffcott rotor at parametric anti-resonance (277)
- Direct antiresonance continuation for non linear dynamic absorbers (346)
- Optimization of Planetary Gear Systems (425)

Energy Transfer and Harvesting in Nonlinear Systems

- Energy exhanges in a system of a forced linear structure coupled to a chain of nonlinear oscillators (39)
- Front propagation in bi-stable non-degenerate systems: model dependence and universality (79)
- Passive vibration control with a bistable nonlinear absorber (464)

- Extreme Response Mitigation of Stochastically Forced Nonlinear Structures (501)
- Vibration-based energy harvesting via a bistable system: experimental study (340)
- Analytical Solution for Energy Harvesting from Nonlinear Transverse Vibration of an Asymmetric Bimorph Piezoelectric Plate (56)
- Energy exchange and localization in essentially nonlinear oscillatory systems: canonical formalism. (74)
- Nonequilibrium Response of Solids to Thermal and Mechanical Perturbances of Submicro and Nanosecond Duration (127)
- Three-dimensional Energy Channeling in Unit-cell Model Coupled to a Spherical Rotator (139)
- Passive realization of a nonlinear piezoelectric tuned vibration absorber with a saturable inductor (295)
- Numerical studies on piezoelectric energy harvesting from vortex-induced vibrations (224)
- Parametric resonance of a nonlinear energy harvester for torsional vibrations (512)
- Energy recovery from a pendulum vibration absorber with a maglev harvester (211)
- Nonlinear Vibration Energy Harvesting Using Piezoelectric Tiles Placed in Stairways (297)
- Experimental study of noise reduction using an hybrid electro-acoustic NES (461)
- Energy Harvesting from Vortex Induced Vibration using Period-1 Rotation of Parametric Pendulum (492)
- Inverse scattering problems for the perturbed biharmonic operator (28)

Random Dynamical Systems - Recent Advances and New Directions

- Evolutionary Dynamics of Membership Distribution Functions of a Forced Triple Well Potential System with Fuzzy Uncertainty (66)
- Energy conversion in a dynamic vibro-impact system with dielectric elastomers (169)
- Nonlinear Random Vibrations of Stretched Beam Discretized by Finite Difference Scheme and Excited by Gaussian White Noise (419)
- Approximation of Top Lyapunov Exponent of Stochastic Delayed Turning Model Using Fokker-Planck Approach (429)
- Statistics of the response of a dry-friction oscillator stochastically excited (177)
- Oscillation Patterns in Stochastic Fast-Slow Systems (91)
- Multiscale Methods and Inverse Problems in Modelling of Intracellular Processes (441)
- A Chaotic Linear Operator on the Space of Odd 2pi Periodic Functions (491)
- Advantages of Alpha-Stable Distribution fits for Dynamic Responses of Nonlinear Structures subjected to Random Excitations (495)
- Towards a bifurcation theory for random dynamical systems (523)
- Hyperbolic periodic orbits in nongradient systems and small-noise-induced metastable transitions (526)

Time-periodic systems

- A Feasible Analysis of Quasi-Periodic Mathieu Equations via Floquét Theory (88)
- Hopf bifurcation in a delayed nonlinear Mathieu equation (112)
- On the Analysis of Quasi-periodic Systems and a Novel 'Deterministic' Explanation of the Stochastic Resonance Phenomenon (126)
- Minimum Damping Needed for Vanishing an Unstable Pocket of a Hill Equation (200)
- Damped Hill's Equation and its application to attenuate vibrations (307)
- Large time-periodic systems in engineering applications (24)
- On the Influence of Contact Compliance and Stiction on Vibrational Smoothing of Dry Friction (86)
- Impulsive damping of mechanical systems: periodic solutions and energy harvesting (260)
- Stability and Control of the Fractional Damped Delayed Mathieu Equation (361)
- Stability of amplitude chimeras in oscillator networks (375)
- Modal Analysis of Structures in Periodic States (184)
- Optimal Timing Control Using the Augmented Phase Reduction (145)

- Stability and Vibration Amplitude of the Quasi Periodic Delayed Mathieu Equation wiht Frequeny-Modulated Coefficinets (488)
- Interaction of period-1 orbits in a dual-frequency driven asymmetric nonlinear oscillator (212)
- A Discrete Predator-Prey Conflict Model with Defense Term (225)
- Linear Flows in the Rapid Distortion Limit: Dynamical Systems Analysis of the Kelvin-Townsend Equations (487)

Control and Synchronization in Nonlinear Systems

- Control of mechanical systems with uncertain set-valued friction (100)
- Control of multistability in vibro-impact systems (111)
- On the problem of control resonance oscillations of a mechanical system with unbalanced exciters (203)
- Sufficient conditions for convergence of discrete-time Lur'e type systems (221)
- Active Vibration Control of a Nonlinear System using Pole Placement (240)
- Autoresonant excitation and control of parametric vibration (511)
- A real-time gesture classification using surface EMG to control a robotics hand (37)
- Reference spreading trajectory tracking control: experimental analysis on a one-degree-of-freedom setup (75)
- Dynamic Control of 3D Directional Drilling Systems with State Estimation (229)
- Position Control of a Electro-Pneumatic Clutch Using Takagi-Sugeno Techniques (316)
- Implicit finite element formulation of the inverse dynamics of vibrating robots (332)
- Decentralized guaranteed cost control for synchronization in networks of linear singularly perturbed systems (20)
- Nonlinear Normal Modes of Coupled van der Pol Oscillators Exhibiting Synchronisation (286)
- Mixed synchronization in a triplet of coupled mechanical oscillators (328)
- Synchronisation of beams attached to a rotating hub (380)
- The emergence and breaking of synchrony in networks of dynamical systems (386)
- Effects of an external parameter on the synchronization threshold of time-delayed Hindmarsh-Rose neurons (101)
- Tweezer control for chimera states in small networks (190)
- Computing partial synchronization manifolds of delay-coupled systems (193)
- Beyond complete synchronization of identical systems: multidimensional dynamic consensus (255)
- Delay-Independent Partial Synchronization in Networks of Non-identical Nonlinear Systems with Transmission Delay Coupling (359)
- Analysis of Synchronization in Mutually Coupled MEMS Oscillators Via Surface Acoustic Waves Using a Simplified Non-linear Model (120)
- Switching between coexisting stable periodic solutions by impulsive forces with an application to a vibrating plate (76)
- A robust-tube MPC approach for the analysis of load response of power plants (165)
- Nonlinear control and stability analysis of a stroke limited inertial actuator in velocity feedback (183)
- Dynamic Data-Driven Adaptive Observations in a Vortex Flowfield (232)
- Low-Pass Filter with Hybrid Integrator-Gain Switching for Increased Bandwidth (288)
- Modelling and control of a simplified Traveling system under temperature variation (401)

Fluid-Structure Interaction

- Analysis of stability transitions in a microswimmer with superparamagnetic head (202)
- Cascade of bifurcations in nonlinear transonic panel flutter oscillations (118)
- Slow-invariant-manifold resonance capture in vortex-induced vibration of a circular cylinder with a nonlinear dissipative rotator (150)
- Computing the viscous fluid flow between moving cylinders of an arbitrary cross-section (204)
- Nonlinear damping types in wake oscillator model for vortex-induced vibrations of 2DOF rigid structure (206)

- Flow-induced vibration of a D-shape cylinder (261)
- Robust Maneuver Load Alleviation via LPV Aeroservoelastic Model (135)
- Recursive Modular Approach for the Modeling and Simulation of a Pipe Conveying Fluid (179)
- Periodic Regimes Caused by Ice-Fluid-Simple Oscillator Interaction (109)
- Stabilization of a Multi-Tethered Lighter-Than-Air Rigid-body Sphere Undergoing Vortex-Induced Vibrations in Uniform Flow (274)
- Intermittent Oscillations of Elastic structure in Fluctuating Axial Fluid Flow (515)
- Flutter of Plate in One Side Flow (284)

Wave Propagation in Mechanical Systems

- Solitary Waves in Dimer Binary Collision Model: A Comparative Study with Granular Dimers (53)
- Wave Propagation in Granular Dimers Mounted on Linear Elastic Foundation (54)
- Influence of Metal Internal Defect on the Propagation of Shock Wave (57)
- Numerical Investigation of pad or air gap between the high explosive and flyer in impelling (68)
- Wave Propagation in Nonlinear Implicit Lattices (209)
- Parameter Sensitivity in Experimental Wave Propagation Studies with Beam like Structures: Shadow of Chaotic Scattering in Continuum Structural Dynamics? (364)
- Symmetry-induced dynamic localization in lattice structures (199)
- Variety of interfacial patterns in miscible fluids induced by vibrations (210)
- Stability of Capillary Waves of Finite Amplitude (486)
- A numerical study of elastic Fano resonances in degeneracy-broken trapped mode resonators for biosensing applications (356)

Traffic and Vehicle Dynamics

- Cooperative Intersection Automation Using Virtual Platoons (93)
- String stability for cascaded systems subject to disturbances (230)
- Nonlinear traffic modeling for urban road network and related robust state estimation (247)
- Artificial Potential Functions for Control of Automated Vehicles (398)
- Nonholonomic lane change maneuvers for connected and autonomous vehicles (504)
- Nonlinear analysis of the body sway of car-trailer combinations with nonlinear shock absorber and tire characteristics (309)
- The impact of non-smoothness in the tyre-force characteristics on the nonlinear dynamics of towed vehicles (334)
- Robust Dynamic Vehicle Routing for On-Demand Systems under Light Load (397)
- Simplified model of rocking suitcases (446)
- Analysis of traffic data by considering nonlinearity and nonstationarity (496)
- New driver assistance functions for commercial vehicles (531)

ORGANIZERS

Local Organizing Committee (LOC)
Gábor Stépán (chairman)
Gábor Csernák (secretary)
Péter Beda
Gábor Domokos
Zsolt Gáspár
János Józsa
György Károlyi
Gyula Patkó
Tamás Tél
János Vad

European Nonlinear Oscillations Conference Committee (ENOCC)
Giuseppe Rega, Italy (Chair ENOCC)
Vincent Acary, France
Matthew Cartmell, UK
Felix Chernousko, Russia
Oded Gottlieb, Israel
Andrei Metrikine, The Netherlands
Remco Ingmar Leine, Germany
Pedro Leal Ribeiro, Portugal
Alois Steindl, Austria
Gábor Stépán, Hungary
